MERN Stack Developer

MERN Stack Developer with experience in **frontend development**. Skilled in **React, Tailwind CSS, Redux Toolkit, JavaScript, HTML, and CSS**. Familiar with backend technologies like **Node.js and Express.js**. Worked on the **The Wagon House (Admin Dashboard)** as a freelance project, building responsive, user-friendly web applications. Passionate about growing as a MERN Stack Developer.

Technical Skills

- **Languages:** JavaScript, HTML, CSS
- **Frameworks/Libraries:** React.js, Tailwind CSS, Redux Toolkit, Express.js, Node.js
- **Databases:** MongoDB
- **Tools and others:** Visual Studio Code, Github, Postman

Experience

Frontend Developer
The Wagon House

- Designed and developed dynamic and responsive websites using **React.js** and **Tailwind CSS**
- Implemented **React Router** for smooth client-side navigation and private routing for authenticated users
- Integrated features such as adding and uploading car images, including data validation
- Developed a fully functional login page with proper **validation** and user authentication flow
- Improved **website performance** and speed by **55%** through optimization techniques

Projects

AI Trip Planner   *React.js, Tailwind CSS, Framer Motion, Gemini AI*   Source Code

- Generates itineraries based on **dates, destination, interests, and transport mode**.
- Utilizes Gemini AI to provide intelligent suggestions and streamline trip planning for an enhanced user experience.

DevTinder   *Node.js, Express, React.js, Tailwind CSS, Framer Motion, Redux Toolkit, Socket.io, Multer*   Source Code

- Built a **CRUD application** using a RESTful API with Node.js and Express, supporting standard HTTP methods: POST, GET, PATCH, and DELETE.
- Implemented **user profile editing** and integrated **profile image upload** functionality using Multer for handling multipart/form-data and friend request system including sending, accepting requests.
- Developed real-time **chat functionality** using Socket.io, allowing seamless communication between matched users.

HealthBell-an android App *Node.js, Express, Reactjs, Tailwind CSS,Framer motion, Redux Toolkit,CapacitorJS* Source Code

- Developed a full-stack **CRUD application** with a RESTful API using Node.js and Express, supporting POST, GET, PATCH, and DELETE operations.
- Implemented functionality to **add, edit, and delete multiple patients and their associated medicines**.
- Integrated scheduled **local notifications** to remind users about medicines at the appropriate time.
- Added a feature to **view detailed information** about medicine.

Certifications

- Namaste Node.JS by Akshay Saini
